

2019
POST EVENT
REPORT

OHS Leaders Summit USA

2 - 3 October, La Cantera Resort and Spa,
San Antonio, Texas

Welcome

It gives me great pleasure in providing you with our latest Post Event Report from the 2nd annual OHS Leaders' Summit USA which was held at the La Cantera Resort & Spa in San Antonio, Texas on October 2-3 2019.

At Media Corp International we pride ourselves on delivering top class events dedicated to providing thought leadership, peer to peer networking, topical debates and direct exposure to the country's most senior industry leaders.

The discussions at the 2019 OHS Leaders Summit USA were focused on challenges and trends that the Occupational Health and Safety industry and its leaders are currently facing around mental health, new technologies and staying on top of the updated legislations.

Showcasing their subject matter expertise were a host of speakers from top-tier local and international businesses including Robert Emery from University of Texas Health Science Centre, Elle Osborne from Baker Hughes a GE Company and Solomon Egbe from Ports America to name a few.

In this report you will find some extremely useful data from our attending delegation that has been captured by our team including their key challenges and top investment priorities for the next 12 months along with an overview of all speakers and topics that were discussed over the 2 day summit.

We would like to thank all of our attendees, sponsors, partners and speakers who took part in this year's OHS Leaders' Summit USA and hope the following information provides you with a greater insight around the platform.

ANNUAL COMPANY TURNOVER SUMMARY

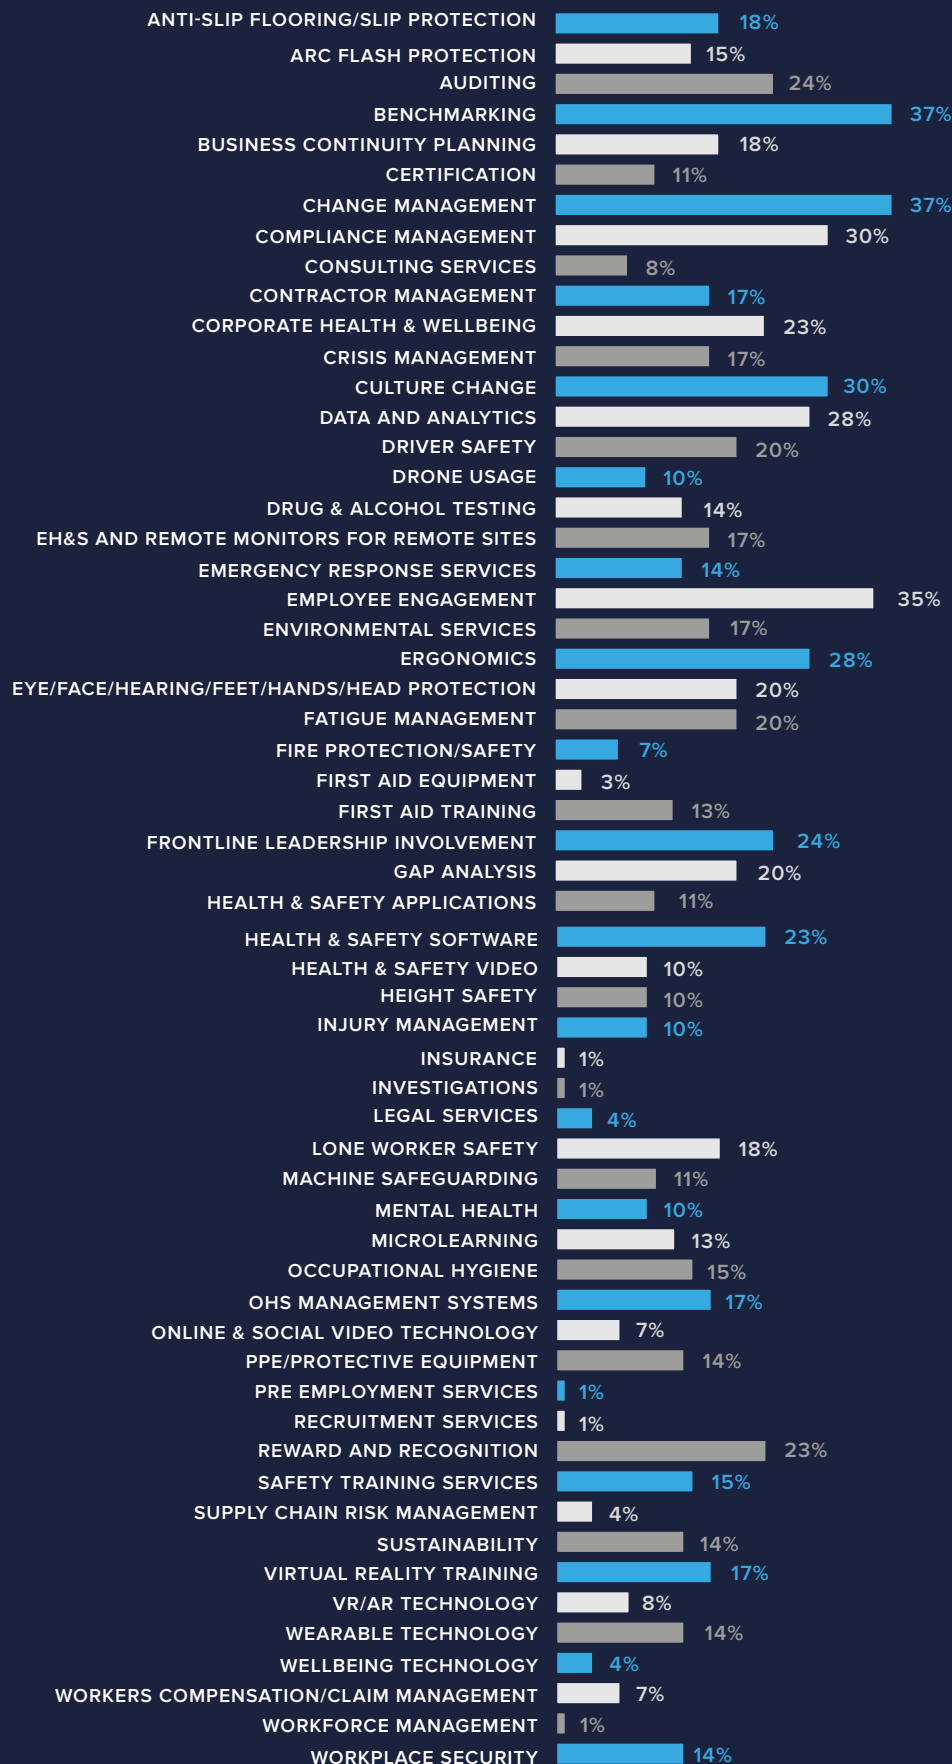

PERSONAL BUDGET RESPONSIBILITY SUMMARY

INVESTMENT PRIORITIES OVER THE NEXT 6-12 MONTHS

INVESTMENT PRIORITIES OVER THE NEXT 6 - 12 MONTHS

Some Of Our Attendee's

COMPANY NAME	JOB TITLE
AECON	Senior Vice President EHS
Aftermath Services LLC	Vice President, Safety & Compliance
Alcoa Corporation	Aluminium EHS Director
Allegion	Eastern Americas Regional EHS Leader
Altria Client Services	Director, Safety, Health and Environmental
Apeel Sciences	Environmental Compliance Specialist
Ashley Furniture Industries	Regional EHS Manager - America
Balfour Beatty	VP/Safety Health and Environmental
BHGE Baker Hughes, a GE Company	Global HSE Director
Breakthru Beverage	Director of Safety
Bridgestone Hosepower	Corporate Director- Safety and Health
C.H. Guenther & Son	Global EHS Director
Capital Metro Transportation Authority	VP, Safety, Risk Management, and Accessible Services Management
CHS Inc	Global Director of EHS
Consolidated Grain & Barge	Safety Director
Constellation Brands Inc	Vice President EHS, Wine & Spirits
Contourglobal	Africa HSE Manager
Crowley Maritime Corporation	Managing Director, HSSQE
Danaher	Chief Environment, Safety & Health Officer, Danaher Water Platform
Dover Precision Components	EHS Director
EMCOR Services / Mesa Energy Systems, Inc.	Safety Director
FNF Construction	Safety Director
Fruit of the Loom	Director Environmental, Health & Safety
Henegan Construction Company. INC	Director of Safety and Risk
Hotel Valley Ho	Director of Security
HydroChemPSC	Senior Vice President - EHST
Jacobs Engineering Group	Senior EHS Professional
Jacobs Engineering Group	Global Director Health & Safety
L3Harris Technologies	Senior Director EHS&S
Louis Berger US, Inc.	Associate Vice President Health and Safety
Memorial Hermann Health System	EHS Corp Manager

COMPANY NAME	JOB TITLE
Memorial Hermann Health System	Quality and Patient Safety
Messer Americas	Vice President HSEQ
Orange County Transportation Authority	Corporate Manager, HSEC
Organic Technologies	Director EH&S
Paramount Pictures Corp.	VP, Environmental Health & Safety (EHS)
Partner Industrial	Vice President of EHS
Pentair	Director, Global EHS
Ports America	Director, Health, Safety & Environment
PW Power Systems	Corporate EHS Manager
Rayonier	Safety Manager U.S. Operations
Rayonier Advanced Materials	Director, Health, Safety and Security
Schetter Electric, LLC.	Corporate Safety Director
Sutter Gold Mining Company	Vice President - EHS
Tepa, LLC	Corporate Director Safety and Health
The Boldt Company	Corporate Safety Director
The University of Texas School of Public Health	Vice President for Safety, Health, Environment & Risk Management
TraPac LLC	Assistant Vice President Health, Safety, Security, and Environment
Valent USA	Director of EHS & Security
VIA Metropolitan Transit	Manager of Safety
Visionworks	Director, EHS
Worley	Assurance Director
WorleyParsons	Group Assurance (HSE/Quality/Risk) Director
Zachry	VP of Safety
Ziegenfelder	Head of Environmental & Safety

One-to-one Business Meetings

Over 130 one-to-one business meetings took place at the 2nd OHS Leaders' Summit USA allowing both buyers (delegates) and sellers (sponsors) the opportunity to engage with one another onsite in a series of pre-arranged business meetings. These meetings provided both parties a great opportunity to build new relationships and discuss purchasing opportunities by interacting face to face.

One-to-one Testimonials

I loved the 1:1 opportunity to meet and chat with experts as they were able to give me insight, guidance, and suggestions on how to run a successful safety program

Carissa Imrecke

Quality and Patient Safety,
Memorial Hermann Health Care

MEMORIAL
HERMANN

I like the one on one meetings, I like the casual attitude of the meetings, no hard sell

Tracy Linhart

Director of Safety,
Breakthru Beverage

BREAKTHRU
BEVERAGE GROUP

Outstanding and one of the primary reasons I attend these type of events.

Steve Trickel

VP of Safety,
Zachry

ZACHRY

Great company dedicated to making great product

Terry Bauer

Director of Security,
Hotel Valley Ho

HOTEL
Valley Ho

Very informative and looking forward to getting more information from each supplier.

Chris Masters

Global EHS Director,
C.H. Guenther & Son

C.H. GUENTHER
& SON, INC.

Time well spent. I like that it did not feel like a timeshare meeting.

Dustin Casey

Eastern Americas Regional EHS Leader,
Allegion

ALLEGION
PIONEERING SAFETY

Session Summaries - Day 1

OPENING KEYNOTE

ELLE OSBORNE

Global HSE Director,
BHGE Baker Hughes a GE Company

Leading for HSE, Can You Accept Feedback?

During this opening keynote presentation Elle explored the power of feedback in HSE. "Receiving feedback and engaging with employee's from a place of learning allows you to learn more about what risks are involved that, without experiencing yourself, you might not know exist, that then gives you the ability to teach others that skill."

"Everyone has a plan 'till they get punched in the face" – Mike Tyson

KEYNOTE

ROBERT EMERY

DrPH, CHP, CIH, CBSP, CSP CHMM, CPP, ARM,
Vice President for Safety, Health, Environment & Risk
Management, The University of Texas Health Science
Center at Houston
Professor of Occupational Health, The University of Texas
School of Public Health

Making Your Safety Message Stick! 35 Years of Powerful Quotes Collected on Sticky Notes

Successful health and safety programs function largely in the realm of prevention, so on a good day "nothing happens". But the value of "making nothing happen" can be a very difficult message to convey, and often becomes an impediment to our ability to tell our story to key program stakeholders.

After 35 years of practice Robert has learned that the right quote, used at the right time, can be very strategic with regard to achieving desired decision making. These quotes, captured on hundreds of disorganized sticky notes have adorned his office bulletin board for over three decades, and were compiled into a "top ten" list that was shared during this presentation.

The Most Influential Tech Trends that will Impact the Safety Profession

During this keynote presentation, Matthew Browne discussed in detail the 10 most influential technology trends in the safety industry including:

1. Autonomous Thing
2. Augmented Analytic
3. AI Driven Development
4. Digital Twins
5. Empowered Edge
6. Immersive Experience
7. Blockchain
8. Smart Spaces
9. Digital Ethics and Privacy; and
10. Quantum Computing

Matthew also shared insight into Donesafe's crystal-ball predictions for 2020.

Taking Hand Protection Deeper

The safety industry has undergone some impressive changes. Organisations are unsatisfied with where minimum compliance has led them. This plateau of improvement requires safety professionals to push beyond minimums to look for new solutions to age old problems.

Protecting worksite employees from avoidable injuries has become increasingly important as incident reporting becomes more publicly transparent and top management continues to drive towards target zero. HSE managers weigh the price of quality PPE with the potential costs of workers comp claims as they attempt to satisfy increasingly aggressive accounting constraints. As safety managers work to orchestrate high participation safety programs, they are often overwhelmed by both the explosion of new safety products on the market today and the lack of resources to plan, implement, and sustain changes that matter.

Cestusline's experienced team can help you

- Navigate new technology that can prevent incidents before they start
- Simplify and centralise hand safety across your locations
- Improve safety culture through 360 reviews and improvements
- Reduce PPE costs per man hour
- Reduce recordable injuries to hands
- Improve communication of hand safety expectations

Session Key Takeaways:

- New levels of support are available to energize your safety program
- Evaluating the price vs cost of safety is no simple formula
- Emerging trend tracking: What's valuable?
- Testing the tester: Which tests realistically replicate the hazards on YOUR sites?
- Budget Austerity: Reducing costs without risking losses

WORKSHOP

CHRIS DIAZ

VP/Safety Health and Environmental,
Balfour Beatty

Creating a Safety Culture Through Positive Observations

Typically, when we observe, measure and track safety performance we're focusing on what's going wrong. In recent years, Balfour Beatty has discovered that when their teams take the time to recognize what's going right and reward good safety behaviours they begin to shift the mentality and attitude on safety.

"When positive reinforcement is combined with superintendent leadership and best practices, like pre-task planning, we not only shift the culture of safety we eliminate risks from our projects altogether." In this workshop, Chris shared recent examples of a process that is changing the culture of safety at Balfour Beatty.

ROUNDTABLE DISCUSSION

RAY FISHER

Advanced Error Reduction and
Training Manager,
Fisher Improvement Technologies

Advanced Human and Organizational Performance - How Personality Impacts Managing Risk

This interactive session from Ray of Fisher Improvement Technologies touched on the most advanced science-based information and methods related to HOP and the importance of understanding personality tendencies when managing risk.

Different people with different personality tendencies see and manage risk differently. This session introduced attendees to the concepts of how to understand the differences at all levels of the organization to better manage risk and reduce incidents. Attendees were encouraged to download the "E-Colors" App onto their mobile phone before the session and take the Personality Diversity Indicator (PDI) to determine their personality tendencies so that they could get the most out of the workshop.

ROUNDTABLE DISCUSSION

DONNA MCENTEE

Workplace Safety and Health Solution
Manager, Skillsoft

Safety and Health Learning Program ROI Methodology

Determining the Return on Investment for your safety and health learning program can be quite challenging. Building a credible process to evaluate key measurable aspects of your program requires careful thought and consideration. The benefits of conducting an ROI include showing the contribution your program makes to the organization versus the cost (justifying the cost of your training program), demonstrates the value safety and health training provides to the overall success of the organization, and, provides a tool for identifying both useful and ineffective programs or areas in need of improvement.

In this session, Donna explored ROI models, and the process of capturing and evaluating data, and communicating results.

KEYNOTE

RAMON SECO

Assurance Director,
Worley

Driving Mental Health Strategies

The wellbeing and mental health of the employees in the workplace is becoming a key element of the work relationship between employees and employers. Employees are keener to work with employers able to provide a work environment where mental health support can be provided to the employees with relevant employees assistance programs.

"It is the mind that makes the body."

Sojourner Truth

American 1797 – 1883

In this keynote presentation from Ramon he discussed all things mental health and mental concern including what is mental health, differences between mental health and mental concern, signs to look out for, causes of stress and much more.

WORKSHOP

MICHAEL ORAM

Business Development Manager,
dorsaVi

The Evolution of Wearables and Its Advancements into the Workplace

Wearables in the workplace is a hot topic, but what difference can they make to your workplace safety culture? How do you identify risk, design it out, measure and improve?

Traditional ergonomic workplace assessments are subjective and don't paint a full picture of the movement strain being placed on individuals. However, with detailed and objective data, organizations can make fully informed decisions with confidence.

In this workshop attendee's learnt how wearable sensor technology is being used by leading businesses globally to identify movement risk, make manual handling policy decisions, develop and execute effective manual handling training programs, and to inform and guide equipment selection, manage onsite and interactive training programs and change manual handling movement behaviour.

WORKSHOP

BARBARA VEITH

Director Environmental, Health &
Safety, Fruit of the Loom

Chemical Inventory Process Improvement

Fruit of the Loom, Inc. needed a database system that could consolidate chemical inventories from over 30 facilities; track chemical approval processes; provide chemical component listings and handle safety data sheets revisions and updates.

Consolidating chemicals between facilities and handling safety data sheet revision updates is very difficult and time consuming. Fruit of the Loom was searching for a system that would allow them to share their chemical inventories across all divisions and assist in compliance with OSHA Hazard Communication standard, EPA reporting and customer requirements.

This workshop showed how they were able to implement a database management system that consolidates all their facility inventories; handles revisions and updates; streamlines their approval process; reduces their overall chemical inventory by 20%; complies with reporting regulations worldwide and simplifies their process to answer customer inquiries.

KEYNOTE

CHARLES KENDALL
Global Director of EHS,
CHS Inc.

Transforming the Enterprise - Building a Center of Excellence for EHS and Fleet Excellence

This session described CHS's journey of creating collaboration of EHS leaders into their Business Units to drive EHS and fleet transformation. This session highlighted methods these teams used to improve EHS and fleet systems and create a sustainable EHS and fleet management system for the organization for years to come.

PANEL SESSION

MODERATOR:

ANDREW BARRETT
Chief Connector,
Safety on Tap

PANELLISTS:

JOHN GREEN
Senior Vice President
EHS, AECON

DARCY ROBISON
Director, Global EHS,
Pentair

DIANA COSGROVE
DanaHER Water Platform,
Chief EHS Officer, DanaHER

The Past the Present and Now – Setting Ourselves up as the Next Generation Safety Leaders

This panel discussion from a range of industry experts explored the ever-changing dynamics in the role of a health and safety leader from where it was to where it is today and how to prepare for the future of the role as a safety leader.

ROUNDTABLE DISCUSSION

ALLISON MONTGOMERY

Senior Director EHS&S,
L3Harris Technologies

Integration of Workers Compensation and EHS

During this roundtable session, Allison shared a detailed insight into the benefits of using one stream-lined tool for workers compensation management that has fully integrated into L3Harris Technologies overall EHS management system software.

ROUNDTABLE DISCUSSION

BRIAN WEDEMEYER

Vice President of EHS,
Partner Industrial

Evaluating Leadership's Effect on Employee Engagement

This roundtable session from Brian evaluated the relationship between leadership behaviours and employee engagement. Various theories and research findings were presented to begin a discussion on what this means for safety professionals. This session was for professionals who direct this functional strategy within their organization.

Session Summaries - Day 2

KEYNOTE

JOHN GREEN
Senior Vice President EHS,
AECON

The Curious World of Safety

Safety has traditionally been about the elimination of negative outcomes (incidents, injuries, errors, malfunctions). While this approach has led to significant improvements it has also produced several problematic side effects: disengagement and disempowerment of people, increasing bureaucracy, loss of innovation and productivity. Furthermore, many organisations now struggle with plateauing safety records. Some industries even experience increasing injury and fatality rates despite unprecedented investments in safety.

Over the last 5 years, a growing number of organisations and thought-leaders have developed a set of ideas and practices that help organisations to overcome the current impasse.

This session explored the required changes to what safety leaders do and how it's done as HS practitioners as well as the shifts in skills and competencies that are needed to make this paradigm change happen.

KEYNOTE

DOUG MARTIN Vice President, Gensuite	JEREMY DUMOND Sr. Global Director of Health, Safety, and Environmental, Wyman-Gordon
JAMIE BRITT Leader, Business Development & Strategic Innovation, Gensuite	

Gensuite Solution of integrating H&OP into your Digitized EHS Management System

This session discussed Jeremy's story of implementing H&OP and his journey that led to Gensuite. Discussions focused on:

- Initiating H&OP engagement at PCC-Wyman-Gordon Forgings, Inc
- Leadership engagement with H&OP program development expectations
- H&OP implementation
- On-going H&OP engagement opportunities and challenges
- Integration with Digitized EHS management system
- Gensuite solution of integrating H&OP into your Digitized EHS management system
- Future of H&OP at PCC-Wyman-Gordon Forgings in Gensuite.

WORKSHOP

CATHERINE WEST

Global Director Health and Safety,
Jacobs Engineering Group

Making Mental Health Matter – An Enterprise Experience

Mental health concerns are an emerging risk that drive all key performance metrics, including safety. Developing a strategy to address these concerns in the workplace and normalizing conversations around the subject to reduce the associated stigma are paramount to building a culture of caring throughout the organization.

Discussions during this workshop included highlights of the Jacobs Global strategy to improving the overall good health and well being in the organization.

WORKSHOP

RAY FISHER

Advanced Error Reduction and
Training Manager,
Fisher Improvement Technologies

Effective Engagement - Moving from Empowering to Enabling

This workshop allowed attendee's to learn from a pioneer in human and organizational performance how incorporating personality diversity into how people see and manage risk helps move people from simply being empowered to stop work and get help, to enabling them to effectively engage in a way to prevent errors and incidents.

Effective engagement and enabling also drive better use of near-miss and near-hit reporting and analysis. Using the lessons learned from engaging the volunteers for Superbowl 51, Ray provided an 'intentional communications' tool that everyone who attended will now have the ability to use.

WORKSHOP

STACEY LUCAS

Head of Environmental/Safety,
Ziegenfelder

Turning Conventional Continuous Improvement Processes Upside-Down Through Positive Work

This workshop explored a case study on a corporate program called +Projects where:

- Successful work is defined and recognized based on all factors of success (e.g., scope, schedule, budget, safety);
- You can determine why success has occurred through a causal analysis;
- Establishing what positive actions need repeated across the company to assure success is repeated by choice, not chance.

ROUNDTABLE DISCUSSION

SOLOMON EGBE

Corporate Director, Health, Safety and
Environment, Ports America

Hybrid Behavior Based Safety Program

This session reviewed Ports America's safety program, SAFE PORTS. A "hybrid behavior based" safety program that has become a very potent tool to effect post-merger integration in various marine terminal organizations and most specifically, Ports America Inc. There is a saying in the Maritime Industry that "when you've seen one port, you've seen one port – no two ports are alike".

SAFE PORTS has been used to not only position Ports America, an organization that operates 80 marine terminals in 50 ports along the 3 coasts of United States, as a leader in safety in the Maritime Industry, but has produced extra ordinary results in the alignment of the subcultures within this organization that became the largest marine terminal operator following the merger of multiple legacy companies.

It's Fatal 5 Program prevents fatalities; It's Roadmaps Program outlines a systems approach towards safety excellence; Its GAP Analysis and Peer Review Programs identify weakened defenses and recommends corrective actions proactively; and Its Walkabout Program encourages the elimination of unsafe behavior, mentoring and coaching.

ROUNDTABLE DISCUSSION

JOHN PACE

Director – Safety and Health,
Bridgestone HosePower

Risk Assessment; Best Practices and an Overview of the Bridgestone Safety Philosophy

This session covered an overview of Bridgestone's safety fundamentals global management system, and some general examples of the businesses mission to serve society with superior quality. It also covered Bridgestone HosePower's operations and how risk assessment influenced their original equipment manufacturing, mobile service, and service branch operations.

To serve the intent of the breakout session and promote interactive discussions, John then solicited examples of best practices from the group, and offered insight to those who inquired if principles of the Bridgestone Way could be applied to their own company.

ROUNDTABLE DISCUSSION

CARL SALL

Associate Vice President Health and
Safety, WSP Louis Berger US, Inc

Influencing Skills for HSE Professionals

In today's challenging environment, health and safety professionals have the skills to implement management systems, but many lack the skills to convince Sr. Management to take the lead or approve critical programs.

This roundtable was host to an open discussion on various techniques on how to influence and persuade people.

Some of the techniques discussed may have been found as ethically and morally questionable, but it is important to know and understand them so they will not be used by others to influence you. Participants needed to understand that there are many more techniques than what were discussed, but the techniques that were discussed are some of the most commonly used.

ROUNDTABLE DISCUSSION

DON WILSON

Vice President,
SafeStart

Leadership for Today's 24/7 Safety Problems

Since the vast majority of injuries and accidental deaths occur outside the workplace, many organizations are trying to determine how their current safety management system will protect their employees 24/7. For most companies, the cost of off-the-job injuries is higher than on the job, and command and control strategies have had little positive effect.

Employees need to be introduced to practical tools that can be used every day to reduce injuries both on and off the job.

This session explored how you can recognize the repeated critical errors that are made in virtually all injuries and drastically reduce injuries 24/7.

KEYNOTE

CARL SALL

Associate Vice President Health and
Safety, WSP Louis Berger US, Inc

Working in a Distracted World

As you start another day at work, are you excited to see what you can get completed? If not, what is holding you back? Are you stressed? Is your plate overflowing with work you have yet to start? Between work assignments, meetings, emails, family issues, social media, and the current political climate, it is a wonder that any of us get anything completed. What is more concerning is that what work we complete usually lacks the professional quality we expect. At this point you may feel that there is no way to overcome this challenge, but you would be wrong. This presentation provided techniques to accomplish more while working in a distracted world.

Safety Culture Action Enabled Strategy

Fred held the closing keynote presentation where he spoke about safety culture and action enabling strategies to create a safe workplace including the safety responsibilities of all business parts.

Program At a Glance

DAY 1 – WEDNESDAY, 2 OCTOBER 2019

08:45 – 08:55

Delegate Testimonials

Top notch! Very well organized and extremely knowledgeable industry experts made the summit an amazing experience! It was refreshing to be around leaders willing to share experiences and challenges with solutions that they are facing.

CARISSA IMRECKE, QUALITY AND PATIENT SAFETY, MEMORIAL HERMANN HEALTH CARE

The summit content was well designed - the quality of speaker was high - the topics selected were very relevant - the logistics and preparation was fantastic - the Media Corp Team did an outstanding job supporting the event and the attendees

RAMON SECO, ASSURANCE DIRECTOR, WORLEY

Great summit. Thanks for the invite. I hope to join again next year.

DUSTIN CASEY , EASTERN AMERICAS REGIONAL EHS LEADER, ALLEGION

It was fantastic and I'm very delighted to be a part of it

ABIODUN DAVIES, AFRICA HSE MANAGER, CONTOURGLOBAL

Great summit and great team who put it together. Very well done.

TERRY BAUER, DIRECTOR OF SECURITY, HOTEL VALLEY HO

Extremely impressed with organization and helpfulness of the team members

CATHERINE WEST, GLOBAL DIRECTOR HEALTH & SAFETY, JACOBS ENGINEERING GROUP

Energizing and motivating!

STACEY LUCAS, HEAD OF ENVIRONMENTAL/SAFETY, ZIEGENFELDER

Jamie Britt Fabrizio and I had the opportunity to represent Gensuite at the #ohsleaders (Media Corp International) conference in San Antonio, TX this week. It afforded us an opportunity to reconnect with many current customers, discuss the possibilities of a digital EHS management system new leaders, and to present with Allison Montgomery and Jeremy DuMond on the benefits of integrating Medical and Workers Comp data and H&OP concepts into your standard incident management workflows!

The power of diversity of thought...

I was excited to start new conversations with talented HSE professionals from across a variety of industries today at the OHS Leaders summit.

Enjoyed speaking and gaining new insights on the subject of accepting feedback, a critical leadership skill for learning and improving!

Proud to be a GOLD level sponsor at the OHS Leaders Summit in San Antonio this week. Its been a whirlwind morning packed with one-one meetings and an awesome presentation on How Personalities Impact Risk. Thankful to be here with Dan Baxter, MBA representing #AERO missing the amazing Rob Fisher #fit #humanperformance #improvewithfit #ohsleaders
